SUBJECT: R65LS DECAL MOUNTING

Dear Dealer:

When you receive the new 1982 R65LS, you will find that three decals were by-packed with the motorcycle. In order to place them in the correct position after cleaning is done, follow these instructions:

Use 2 decals, one on each side of the fairing at correct locations

(Distances given in mm)

Install decal in the middle of the rear seat tail section, at the correct location.

NOTE: The red model uses black decals and the silver model uses blue decals. The battery covers of the R65LS have no decals.

Yours truly,

Please route and initials before filing
