RE: ANNUAL BRAKE FLUID CHANGE PROMOTION

Dear Dealer:

We all know that brake fluid changes are often neglected. A reminder of this is also found in every Rider's Manual as following:

"Brake fluid is hygroscopic and is thus capable of absorbing moisture from the atmosphere over a considerable period of time. To ensure that brake systems remain fully reliable, brake fluid must be replaced once a year. Never recycle used brake fluid. Use only DOT 4 fluid from a sealed container."

I.E. In time brake fluid can absorb water. Depending upon the amount of water absorbed, the boiling point of the brake fluid could be lowered to the point that braking effectiveness could be affected.

Water in the brake fluid can also lead to corrosion of brake components resulting in failures that could be avoided with BMW recommended annual fluid changes.

For more information refer to our Service Information No. 34 005 84 (2091).

Shortly you will receive a service promotion package with the following:

1. Poster (The Annual Brake Fluid Change)

We ask you to place this poster near the service counter for all customers to read.

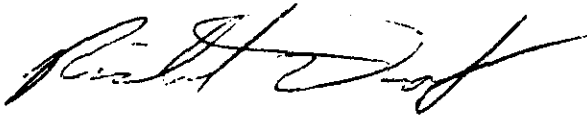

2. Handouts (Leaflets)

They are designed to also be used as a mailer
for your convenience.

Remember, it is a matter of safety!

Sincerely,

BMW OF NORTH AMERICA, INC.
