Lubrication of Clutch Splines

We described in two (2) previous Service Informations [21 003 82 (2064)] and [21 003 83 (2074)] the importance of clutch spline lubrication.

Test results where clutch splines are kept properly lubricated are extremely positive. Stiff shifting of the gearbox and stiffness of clutch operation can be directly attributed to dry or rusty clutch splines.

Lubrication of this area will greatly prolong clutch life, and we recommend the following lubricants only for this purpose:

Optimol Paste-PL

available through
Optimol Lubricants, Inc.
Minue Street
Carteret, NJ 07008
(201) 969-2200

and

Staburags

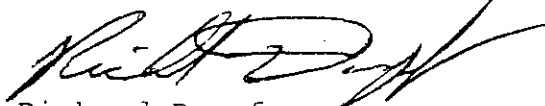

available through
BMW Parts Department

Part No. 07 559 056 992

We urge you to inform your customers of this essential once-a-year service.

Yours truly,

BMW OF NORTH AMERICA, INC.

Richard Dampf
