RE: CLUTCH SPLINES

Dear Dealer:

To maintain constant efficient clutch action and longevity, the clutch and input shaft splines should be inspected, cleaned and lubricated during each service or at least once a year.

Please use exclusively "Optimol Paste PL" in this wear and tear area on all models old and new. It is essential that the splines on the input shaft and on the clutch plate are carefully cleaned (degreased) before using Paste PL.

Testing has proved prolonged clutch life with this lubricant.

Paste PL can be ordered from:

Optimol Lubricants, Inc.
Minue Street
Carteret, NJ 07008
201-969-2200

Yours truly,

BMW OF NORTH AMERICA, INC.
