Munich, Jan. 71
Nr. 3/70 (301) eng.

Ref.: Winter oil for transmission, flywheel and rear wheel drive

Dear Sirs,

for winter service always use for transmission, flywheel and rear wheel drive the brand hypoid transmission oil SAE 80, which we released after long tests, since at low outer temperatures there is the danger that the tough hypoid oil SAE 90 will be pressed out via the ventilation.

We recommend as follows:

- outer temp. above + 5°C brand hypoid transmission oil SAE 90
- outer temp. below + 5°C brand hypoid transmission oil SAE 80

We propose to use from November until April generally for the mentioned types brand hypoid transmission oil SAE 80.

Very truly yours,
BAYERISCHE MOTOREN WERKE
