RE: HIGH ALTITUDE PERFORMANCE ADJUSTMENT
(Over 4,000 feet above sea level for
all 1978 - 1983 models)

Dear Dealer:

EPA requires from the manufacturers of motor vehicles to provide altitude performance instructions. (This requirement is applicable to all motor vehicles to which Title II of the CAA applies.)

To improve the emission/performance of low altitude vehicles when operated at a high altitude, a main jet change, as recommended in the enclosed list, is necessary.

When such a vehicle is changed to high altitude settings, a label (see sample below) must be affixed to the rear fender next to the original vehicle emission control label. This label should be requested through the motorcycle service department in writing quoting No. 2 121 222.

For customer information purposes, please display a copy of this Service Information in your showroom or customer waiting area.

Yours truly,

Herb Neas
National Service Manager
