Low Fender Mounting on R100GS Paris-Dakar 1990 Models

Also included in this Service Information are 1988 and 1989 R100GS motorcycles on which the optional Paris-Dakar Kit has been installed.

Please review Service Information 46 027 90 (2405) for complete details.

If your customer chooses to install a low fender on a 1988-1990 R100GS or Paris-Dakar with an engine spoiler, the following part numbers must be used:

46 61 2 315 648 Black
46 61 2 315 647 Red
46 61 2 315 646 White

These fenders are approximately 2 inches shorter than the previously supplied low front fender.

New Fender 29 3/4" Long
Old Fender 31 3/4" Long (not to be used with engine spoiler)

These fenders should not be confused with the 1991 low fenders, which have a completely different part number and mounting hole locations.

Please refer to S.I. 46 032 91 (2451) for 1991 model R100GS or Paris-Dakar.

Very truly yours,

BMW of North America, Inc.
