PAINT COLOR CODES 1970 - 1978

Group 51 - Paints

Dear Dealer:

To make more convenient the job of selecting matched painted components and paint kits, below is a complete summary of all BMW motorcycle colors used since 1970. Also, you will note that each color is coded with a three-digit code number.

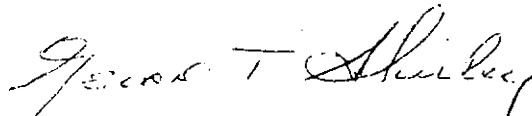

This code number may be used in reference to your current parts microfilm and parts book No. 01 09 9 796 024. These are not, however, parts system numbers, which must be arrived at after cross-referencing to the microfilm. When using the parts microfilm, also note that many parts are available with different colors of pin-striping. Read the listing carefully to ensure accuracy of choice.

| <u>Paint Code</u> | <u>Color Description</u> | <u>Years</u> | <u>Models</u> |
|-------------------|--------------------------|--------------|---------------------------------|
| 060 | Imola Polaris Silver | 1972 - 1974 | R50/5 - R90/6 |
