RE: PIRELLI TIRES

Dear Dealer:

After extensive tests, we are now recommending and approving the use of the following type Pirelli tires on all R50/5 - R100RT, with the exception of all R65s.

On all 1981/82 models, we recommend the use of these tires only on rims up to a maximum of 2.50 inches width.

Front -	100/90 V 19 with tube:	Mt 29 Phantom 12 A 19 SS
Rear -	4.00 V 18 with tube:	Mt 28 Phantom 14 A 18 SS

When mounting, observe the arrows on the sidewall of each tire.

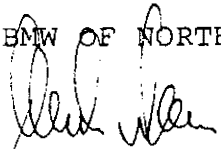

NOTE: Both front and rear tire arrows must point in the direction of travel.

It is possible that on some older models the front tire could interfere with the front fender brace; therefore, exchange the old one with the new brace:

Part No. 46 61 1 234 907

Yours truly,

BMW OF NORTH AMERICA, INC.
