Munich, Feb '73
No. 1/73 (058 M) e

Ref: Quartz-iodine headlamp for our /5 models

Dear Sirs,

Upon request (quoting the code number 56.1), our motorcycles can be supplied with a H4 quartz-iodine headlamp at an extra charge. This headlamp gives an increase of approx. 70% in the light yield.

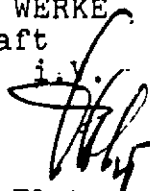

The headlamp, which was developed in cooperation with Messrs. Bosch, has been provided with a diffusing lens especially designed for the motorcycle and ensuring better illumination of the road ahead.

If you wish to fit a quartz-iodine headlamp to motorcycles already delivered (at an extra charge), a complete modification kit, Part No. 63 12 1 356 759 must be installed. This kit comprises a diffusing lens, retaining ring, reflector and bulb.

The new quartz-iodine headlamp has a power input of 55/60 W.

Yours faithfully,
BAYERISCHE MOTOREN WERKE
Aktiengesellschaft
ppa.
