Munich, June 70
No.1/70(283)

Ref.: Stop Light Switch for Foot Brake

Dear Sirs,

the stop light switch for the foot brake has got at the models

R 50/5 from chassis No. 2 900 689

R 60/5 from chassis No. 2 931 055 and

R 75/5 from chassis No. 2 971 013 on

an isolating plate of Pertinax between plastic housing and base plate. By this, possible short circuits between the plus-contacts of the switch and its base plate are avoided.

Please, equip also the motorcycles produced before the indicated chassis numbers with the new stop light switches. The modification has to be effected in the following way:

Pull off rubber protection cap from housing and draw it back somewhat on the cables, loosen both lines, screw off 2 cylindrical screws of the stop light switch housing, take out old switch, order No. 61 31 8 048 165, and replace by new switch, order No. 61 31 1 353 684.

The necessary labour for this work is 2 FR-.

Yours very truly,

BAYERISCHE MOTOREN WERKE
Aktiengesellschaft
i.V. i.V.
