R100GS/R100GS P-D Saddlebag Mounts - 1991 Models

R100GS P-D:

The R100GS P-D is manufactured with saddlebag mounts installed during production. The mounts are chrome plated so that they are more corrosion-resistant. A noticeable change this year is the new Matte Black cross support which improves the strength of the saddlebag mounts in rough-duty applications:

72 60 2 315 680 - Case Rod Chrome

72 60 2 315 678 - Case Rod Black

R100GS:

If your customer chooses to install saddlebag mounts, the new cross support must also be installed.

Note:

The cross support may also be fitted to 1988, 1989, and 1990 models at the owner's expense, with particular benefit during rough-duty applications.

Very truly yours,

BMW of North America, Inc.
