For USA Only

Tire Valve Stems - All Tubeless Tire Models

INFORMATION:

The threaded-type valve assembly used on early production tubeless tire rims has been replaced with a rubber valve similar to the one used on automotive rims.

IMPORTANT:

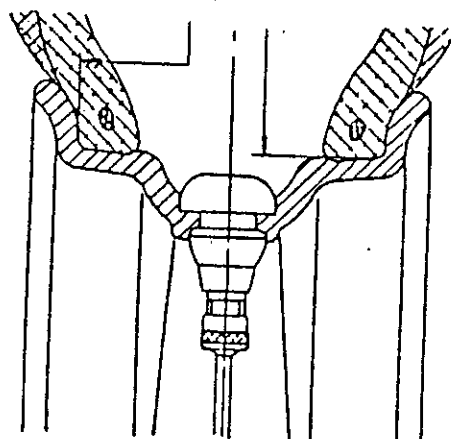

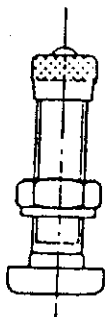

The two versions **cannot** be interchanged, as the rims have been modified accordingly. Please make sure your Parts Department and Service Technicians are informed of these changes. Most replacement wheels ordered from our Parts Department will employ the new rubber valve stem system. Therefore, be sure to order a replacement valve stem when ordering a new wheel.

Very truly yours,

BMW OF NORTH AMERICA, INC.
